CONSOLIDATED RESOURCE IMAGING[®]

SUMMARY OF QUALIFICATIONS

Consolidated Resource Imaging (CRI) is a veteran owned, small business focused on ISR systems development, integration, test and operations. We provide flight-testing, operations, intelligence and imagery analysis, and subject matter experts for wide area exploitation and many other imagery based programs. Our team of aerospace engineers have a combined 250+ years of avionics experience in ISR sensor systems, flight management, weapons management, targeting, mechanical analysis, data link communications, flight testing and data/video management systems. Our intelligence team has an average of over 20 years of individual experience in all aspects of intelligence gathering, analysis, production, and execution, with a majority of that experience gained in the Special Operations environment. With innovation and reliability as our hallmarks, we are staffed and equipped to support all phases of development, testing and operational deployment of advanced ISR systems.
