

How should our nation make investments to protect our borders and national infrastructure? How do we measure risk? How do we determine if our country is prepared to respond to an emergency, whether manmade or a natural disaster?

For over 20 years ICF International (NASDAQ:ICFI) has been supporting border and transportation technology, and other issues that protect the communities where we live. Our work includes:

- Program Management and full Lifecycle Acquisition Management Support
- Systems Engineering support
- Strategic and Tactical Planning, Alignment, and Integration
- Logistics, including training
- Business Process Improvement and Performance Management
- Risk management evaluations, security audits, safety architecture
- Emergency planning, training, exercise development, continuity of operations, public communications
- Organizational Change Management, Workforce Management, and Training

We specialize in forming partnerships that promote homeland security across federal, private, and community stakeholders. We are at the forefront of our nation's most critical homeland security concerns. ICF is:

- An Executive Sponsor of the George Washington University Homeland Security Policy Institute.
- A member of the Advisory Innovator Circle, of the American Council for Technology (ACT) - Industry Advisory Council (IAC).
- Member of the Global Executive Council of the Project Management Institute, the leading nonprofit professional association dedicated to the advancement of project management.

ICF is a prime contractor for the Technical, Acquisition and Business Support Services (TABSS) contract, a DHS-wide strategic-sourcing vehicle for acquisition and technology management, program management, and systems engineering.
