

Capability Statement

About Us:

CCSN is an emerging Surveillance and Security service provider on Costal Border management providing long range coverage capabilities. Our operations are minority owned with base in the Caribbean (Puerto Rico and LATAM); with over 15 years of telecommunications engineering, infrastructure development and technology experience. The CCSN team is positioned to offer innovative and cost-effective technological solutions to the border's drug, immigration and accompanying violence issues.

Core Competencies:

- **Site Acquisition, Development, Support and Management** - CCSN provides turnkey facility solutions for Surveillance and Security service management using integrated approach that include requirement development, sites construction, systems acquisition and integration.
- **Surveillance and Security Program Management** - CCSN services are built on our in-depth knowledge of Security, telecommunications, Technology, Engineering and program management life cycles. We provide staff augmentation in support of operations and more importantly, we help our clients achieve programmatic success by focus on ensuring programs are delivered and executed on time and within budget.

Differentiators:

- CCSN deliver high quality network and technology integrations. Our delivery model is to provide world class service, while mitigating risk and ensuring sustainability.
- A minority owned and well established business or focus is our client. Your mission is our mission.
- Our staffs are subject matter experts in several engineering competencies, who deliver fully integrates solutions across the entire spectrum on the surveillance program's lifecycle.
