

Thruvision Overview

Thruvision Group plc is a specialist provider of people-screening technology that can detect weapons, explosives and contraband hidden under clothing. Thruvision technology is operationally proven and is being used to enhance the security of transport hubs, borders, high profile buildings and public areas - www.thruvision.com

Thruvision Inc. is a wholly-owned subsidiary and is located in Ashburn, VA. US manufacturing is based in Melbourne, FL. There are no ITAR restrictions on Thruvision technology.

Solutions for US Customs

Stand-off people-screening technology to strengthen customs and border control and to detect concealed contraband.

Thruvision is a proven people-screening camera able to detect any type of object hidden under clothing. Based on patented, passive millimeter-wave technology, Thruvision provides a fast, safe and operationally proven way to screen travelers for contraband and other prohibited items at customs check points.

How can I use Thruvision to improve my customs screening?

- Screening time of 8 seconds per person
- Full-body screening with no blind spots
- Detects all types of material, and objects as small as 5cm²
- Easy to see size, shape and location of concealment
- No physical search of person needed
- Compact size allows flexible deployment
