Attn: Mr. Merv Leavitt

Dear Mr. Leavitt,

Please accept this letter containing the short description of Analogic's business as it applies to research and development in the border security technology field accompanying our Application.

Founded in 1967, and headquartered in Peabody, MA, Analogic Corporation is a leader in advanced computed tomography (CT) imaging technology. Its engineers have received hundreds of patents for innovations in CT technology in medicine and aviation security. Analogic has on-going investment in research and development, in areas such as automated threat detection algorithms, high speed image reconstruction, high performance X-Ray detectors, and machine learning. Analogic has successfully completed US government research contracts as well as internally funded R&D projects. Analogic is part of Altaris Capital Management. To learn more, visit www.analogic.com.

Best regards,

Annette Lomas
Executive Assistant
