

Based in Warrenton, Virginia, DroneShield is a worldwide leader in drone security technology. The Company has developed the pre-eminent drone security solution that protects people, organisations and critical infrastructure from intrusion from drones. Its leadership brings world-class expertise in engineering and physics, combined with deep experience in defence, intelligence, and aerospace. DroneShield continues to engage in R&D as part of its leadership position in the counterdrone space globally.

As it relates to border security, R&D has been focused on developing solutions geared towards combating enemy drones including drones deployed to monitor security operations, smuggle contraband across borders, capture sensitive information, or transport and detonate destructive payloads. DroneShield's current solutions include DroneGun portable rifle-shape countermeasure, DroneSentinel multi-sensor detection and DroneSentry detect-and-defeat system, all of which have been developed through a significant R&D effort.
