

The science you expect.
The people you know.

APPLIED SCIENTIFIC AND ENGINEERING RESEARCH

USING SCIENCE AND TECHNOLOGY TO CREATE SOLUTIONS FOR A SAFER, HEALTHIER, MORE SUSTAINABLE WORLD.

RESEARCH AND DEVELOPMENT

MRIGlobal provides applied research and development services to clients in government, industry, and academia. With our diverse capabilities and our cutting-edge technologies, we deliver smart, customized solutions that meet your precise research needs.

TEST AND EVALUATION

MRIGlobal delivers independent, third-party test and evaluation services, providing independent evaluations of technology, products, and protocols. Over the years, we have tested and assessed hundreds of both government and commercial client-provided products for chemical characterization including identity and impurity profiles.

MANAGEMENT AND OPERATIONS

MRIGlobal has built a strong reputation of excellence in management and operations of laboratories, facilities, and test capabilities based on sound research, development, demonstration and deployment, as well as an exemplary record in safety and quality performance. MRIGlobal is a recognized leader in management and operations.

OUR MISSION IS YOUR SUCCESS.

Working in Global Health and Security, Security and Defense, and Energy and Infrastructure, MRIGlobal takes on difficult scientific and engineering challenges, providing personalized service that larger contract research organizations can't offer. We are recognized internationally for our diverse and cutting-edge technical capabilities and our unrelenting commitment to high quality, responsiveness, and collaboration.

CAPABILITIES

- Management and Operations
- Counter Weapons of Mass Destruction
- Infectious Disease and Biological Threat Agent Detection
- Medical Countermeasures
- *In Vitro* Diagnostics
- Global Biological Engagement
- Clinical Research Support
- Biomedical Monitoring

ABOUT MRIGLOBAL

Founded in 1944, MRIGlobal is an internationally-recognized independent organization performing customized contract scientific and engineering research, as well as management and operations, for government and industry. With a focus on translating new technologies that support better health outcomes for humans, animals, and our environment, MRIGlobal delivers smart solutions with an unrelenting commitment to high quality research, collaboration, and customized results.
