

We are data people. We deliver real-world artificial intelligence and machine learning solutions to our customers across the defense and intelligence communities, including object detection in ground-level imagery, motion tracking, perimeter extraction and prediction, automated search text and discovery, and predictive maintenance on sensor data.

Our powerful, low risk solutions automate and augment the agency task for increased situational awareness and highly-accurate intelligence you can trust.

MISSION SOLUTIONS @ SPEED, SCALE & PERFORMANCE

AUTOMATION & MISSION DEVELOPMENT

- Full lifecycle, Agile AI / ML
- Data Science
- GIS / GEOINT Systems
- Visualization Tools
- Application Development
- Agile SAFe / DevSecOps
- APIs / Microservices
- Rapid Adoption Frameworks
- Robotics Process Automation
- Workflow Automation Platforms
- Records Analytics (Law, Court, NLETs, NCIC, FBI, State Criminal History)

MISSION & BUSINESS OPERATIONS

- Complex Performance Based / FFP mission delivery @ scale
- Unique competency in Security Case Management (people, facilities, supply chains)
- Integrated Continuous Process Improvement
- BPO/BPR
- Records Management
- Information System Analysis & Implementation Expertise
