*Proven and Trusted*

For more than 20 years, Cambridge has been fighting bad actors in both the cyber and physical worlds. We have worked in some of the most challenging domains imaginable including critical infrastructure, illicit trafficking, border security, flight mission assurance, banking and threat finance, and medical and health security.

*Agile, Innovative, Insightful*

Confronting the most threatening or complex obstacles requires agility, innovation, and insightfulness. It demands a multi-dimensional approach. The result is a strategically crafted solution with tactical milestones to solve your problems.

*Security and Surveillance*

Cambridge equips you with the infrastructure, systems, and networks necessary to detect, monitor, gather, and store information. Our experts turn information into meaningful, actionable intelligence concerning current and emerging threats. We support you in protecting both your critical infrastructure and information to ensure vulnerabilities are addressed and eliminated. Our skilled engineers have C5ISR experience in a variety of technologies, allowing them to design surveillance, detection, and monitoring solutions tailored to today's needs and tomorrow's challenges. We support all aspects of security and surveillance from maritime surveillance systems and sensor management suites to interdiction and law enforcement support.

*Critical Infrastructure and Technology Solutions*

Cambridge's solutions address your most critical cyber and physical infrastructure needs. From building and securing facilities to strengthening the security posture of networks and data, our team's expertise can help you reduce vulnerabilities, identify threats, mitigate risks, and ensure business continuity. We protect the security and ensure the resiliency of critical infrastructure so you can focus on your mission without interruption.

*Intelligence*

Our solutions meet our customers where they are, encompassing broad capabilities in threat detection and analysis, intelligence gathering and analysis, intelligence training, and processing and dissemination. Our solutions enhance visibility across organizations and agencies to support strategic decision making and optimize operational readiness in support of the counter-threat mission.

*Law Enforcement*

Cambridge is a global provider of law enforcement technology-based solutions and advisory and training activities at the strategic, tactical, and operational levels. We support both federal and international law enforcement with a wide range of capabilities including monitoring and detection, identifying and generating leads, performing trend analysis, and creating target packages that enable officials to take counter-threat actions. We provide modernization of existing law enforcement systems to optimize operations and design and deploy new tools using the latest software, trend and pattern correlation techniques, and contextual analysis.

Collectively, our solutions and training help to protect our nation's borders, defend our critical infrastructure, advance security to promote prosperity, and create a safer world.
