

Liberty Consulting Solutions LLC

Liberty Consulting Solutions (LCS) has a long history in border security, Research and Development (R&D) and analysis. The President of LCS, Rex Hayes, is a honorably retired Coast Guard officer and helicopter pilot. Serving on the front lines for border security, Rex flew many alien migrant interdiction flights in the Bahamas and Puerto Rico, curtailing the flow of migrants from Cuba and the Dominican Republic. In addition to this mission, Rex flew with the Bahamian Defense Force on apprehension and seizure of narcotics and traffickers. Rex became a “plank owner” of the Department of Homeland Security (DHS) as the service transitioned from Department of Transportation to DHS.

LCS received its pedigree in unmanned systems, related to Intelligence, Surveillance and Reconnaissance (ISR) as Rex went to work for a fortune 500 company and was responsible for Unmanned Aircraft Systems (UAS) ISR services supporting the Air Force and the Special Operations Command in combatting terrorism and keeping them from entering the United States.

Rex performed an analysis and provided a Concept of Operations (CONOPs) report for the Coast Guard pertaining to Unmanned Maritime Vehicles (UMVs) using various UMVs; Seaglider, Slocum G3 and a Navy USV. Rex performed an analysis and submitted a research paper as part of his Masters Degree in Unmanned Systems (Embry-Riddle) on a new power source for the Boeing Unmanned Surface Vehicle, Wave Glider.

LCS is a NJ LLC and is a Service Disabled Veteran Owned Small Business (SDVOSB). LCS is a “non-traditional” defense contractor and is part of the National Armaments Consortium (NAC). Rex holds a R&D patent in a multi-caliber weapon system and is a DHS certified counter UAS instructor, developing and delivering Tactics, Techniques and Procedures (TTPs) training for the country’s First Responders.
